

Venkata Aruna Kumar Panigrahi

React.js Developer | Node.js Developer

arunpanigrahi93@gmail.com | Mobile: 9000255357 | [LinkedIn](#) | [GitHub](#)

Skills

Technologies: React.js, TypeScript, JavaScript, Next.js, Node.js, Express.js, Redux Toolkit, React Query, HTML, CSS, TailwindCSS, Material-UI, MongoDB, PostgreSQL, AWS, Azure, Spring Boot, Git, CI/CD, Jenkins, Jest, React Testing Library, LangChain.js, OpenAI, GitHub Copilot, Claude Code, JWT, Postman.

Certifications: React 18/19, MERN Stack, Claude Code in Action, Prompt Engineering, LangChain Framework (AI Systems +RAG)

Work Experience (7.6+ years)

TATA CONSULTANCY SERVICES (TCS) | *Systems Engineer*

Sep 2021 – Present

- Developed reusable React.js components and optimized front-end performance using code splitting, lazy loading, and bundle optimization, reducing bundle size by 30% and improving page load time by 25%.
- Improved development productivity using GitHub Copilot, Claude Code, and ChatGPT for code generation, debugging, unit testing, and documentation, reducing development effort by approximately 35%.
- Developed a LangChain.js-based AI agent to analyze vulnerability (VIT) reports, recommend secure dependency versions, and automate remediation, reducing manual effort by 60%.
- Implemented an automated certificate lifecycle management solution, reducing manual effort by 80%, improving operational efficiency, and supporting smooth production deployments through code reviews and automated testing.

CROWN SOLUTIONS I.P.L (Contractual to TCS) | *BA Associate*

Oct 2020 – Aug 2021

- Engineered scalable UI architectures using React.js and Bootstrap, accelerating feature time-to-market by 30%.
- Decreased load times by 40% and enhanced Core Web Vitals via advanced rendering strategies and automated image optimization.
- Built secure portals by integrating React.js front-ends with Python/PostgreSQL back-ends and AWS infrastructure.

WML TECHNOLOGIES | *Application Developer*

Jan 2020 – Sep 2020

- Developed fully responsive, mobile-first e-commerce themes and core front-end modules using React.js, Material-UI, Nodejs, MongoDB, and AWS.

KAKINADA SEAPORTS LIMITED | *Systems Executive*

Dec 2018 – Dec 2019

- Automated complex data entry and operational workflows for import/export activities, drastically reducing manual effort and improving data accuracy.

Key Competencies

- React Architecture & Frontend Development:** Designed and developed scalable, responsive single-page applications using React.js, TypeScript, reusable component architecture, custom hooks, and modern frontend best practices to deliver maintainable, production-ready applications.
- State Management, UI Engineering & Performance Optimization:** Built complex frontend applications using Redux Toolkit, Context API, and React Query while developing reusable UI components, implementing responsive and accessible designs, and optimizing performance through code splitting, lazy loading, memoization, and bundle optimization.
- API Integration & Frontend Security:** Integrated REST APIs with robust error handling, authentication (JWT/OAuth), secure token management, form validation, route protection, and asynchronous data fetching using Axios and Fetch APIs.
- Code Quality & Engineering Best Practices:** Conducted peer code reviews, implemented reusable component libraries, SOLID principles, clean code practices, design patterns, technical documentation, and mentored developers to improve code quality and maintainability.
- Testing, Debugging & Production Support:** Developed unit and integration tests using Jest and React Testing Library, performed debugging, resolved production issues, conducted root cause analysis, and improved application reliability through automated testing and continuous monitoring.
- Agile Delivery, Client Collaboration & Deployment:** Collaborated with Product Owners, UX/UI designers, QA engineers, backend teams, and business stakeholders in Agile/Scrum environments, participating in sprint planning, requirement analysis, feature demonstrations, Git-based workflows, CI/CD pipelines, release management, and production deployments.
- Node.js Backend Development:** Developed and maintained secure RESTful APIs using Node.js, And Express.js, implementing authentication, business logic, input validation, database integration, and scalable backend services supporting React applications.
- System Design & Scalable Solutions:** Contributed to application architecture, API design, system scalability, performance optimization, logging, monitoring, and cloud-ready solution design while collaborating with cross-functional teams to deliver enterprise-grade software.

Education

M.Tech (JNTUK) | *Chaitanya Institute Of Science and Technology, Madhavapatnam* | GPA: 75%

2016 – 2018

B.Tech (JNTUK) | *Sri Aditya Engineering College, Surampalem* | GPA: 67%

2011 – 2014
