

Venkata Aruna Kumar Panigrahi

React.js Developer

arunpanigrahi93@gmail.com | Mobile: 9000255357 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Skills

Technologies: React.js, TypeScript, JavaScript, Next.js, Node.js, Express.js, Redux Toolkit, React Query, HTML, CSS, TailwindCSS, Material-UI, MongoDB, PostgreSQL, AWS, Azure, Spring Boot, Git, CI/CD, Jenkins, Jest, React Testing Library, LangChain.js, OpenAI, GitHub Copilot, Claude Code, JWT, Postman.

Certifications: React 18/19, MERN Stack, Claude Code in Action, Prompt Engineering, LangChain Framework (AI Systems +RAG)

Work Experience (7.6+ years)

TATA CONSULTANCY SERVICES (TCS) | *Systems Engineer*

Sep 2021 – Present

- Developed reusable React.js components and optimized front-end performance using code splitting, lazy loading, and bundle optimization, reducing bundle size by 30% and improving page load time by 25%.
- Improved development productivity using GitHub Copilot, Claude Code, and ChatGPT for code generation, debugging, unit testing, and documentation, reducing development effort by approximately 35%.
- Developed a LangChain.js-based AI agent to analyze vulnerability (VIT) reports, recommend secure dependency versions, and automate remediation, reducing manual effort by 60%.
- Implemented an automated certificate lifecycle management solution, reducing manual effort by 80%, improving operational efficiency, and supporting smooth production deployments through code reviews and automated testing.

CROWN SOLUTIONS I.P.L (Contractual to TCS) | *BA Associate*

Oct 2020 – Aug 2021

- Engineered scalable UI architectures using React.js and Bootstrap, accelerating feature time-to-market by 30%.
- Decreased load times by 40% and enhanced Core Web Vitals via advanced rendering strategies and automated image optimization.
- Built secure portals by integrating React.js front-ends with Python/PostgreSQL back-ends and AWS infrastructure.

WML TECHNOLOGIES | *Application Developer*

Jan 2020 – Sep 2020

- Developed fully responsive, mobile-first e-commerce themes and core front-end modules using React.js, Material-UI, Nodejs, MongoDB, and AWS.

KAKINADA SEAPORTS LIMITED | *Systems Executive*

Dec 2018 – Dec 2019

- Automated complex data entry and operational workflows for import/export activities, drastically reducing manual effort and improving data accuracy.

Key Competencies

- React.js, TypeScript & Frontend Development:** Developed scalable, customer-facing web applications using React.js, TypeScript, JavaScript, HTML5, CSS3, reusable component architecture, React Hooks, and modern frontend development practices to deliver high-performance, maintainable, and production-ready user interfaces.
- UI Engineering, Micro Frontends & Responsive Design:** Built reusable UI components and micro-frontend applications by translating product requirements, UX designs, and technical specifications into responsive, accessible (WCAG), and scalable user interfaces aligned with design systems and modern frontend architecture.
- State Management, REST APIs & Performance Optimization:** Implemented state management using Redux Toolkit, Context API, and React Query while integrating RESTful APIs using Axios and Fetch, optimizing application performance through code splitting, lazy loading, memoization, bundle optimization, and efficient asynchronous data handling.
- Testing, Debugging & Code Quality:** Developed unit, integration, and end-to-end tests using Jest, React Testing Library, and Cypress, performed debugging, defect resolution, root cause analysis, peer code reviews, and maintained clean, reusable, testable, secure, and well-documented code following engineering best practices.
- Accessibility, Security & Frontend Best Practices:** Developed accessible web applications following WCAG standards, implemented authentication using JWT/OAuth, route protection, secure token management, form validation, responsive cross-browser compatibility, and web application security best practices.
- Agile Collaboration, CI/CD & Software Delivery:** Collaborated with Product Managers, UX Designers, Backend Engineers, QA teams, and business stakeholders in Agile/Scrum environments, participating in sprint planning, requirement analysis, solution design, Git workflows, GitHub Actions CI/CD pipelines, release management, production deployments, and continuous process improvement.
- Software Engineering & Backend Integration:** Integrated frontend applications with scalable RESTful backend services developed using Node.js and Express.js, contributing to software architecture, cloud-ready solution design, technical documentation, API development, performance optimization, and enterprise-grade software delivery.

Education

M.Tech (JNTUK) | *Chaitanya Institute Of Science and Technology, Madhavapatnam* | GPA: 75%

2016 – 2018

B.Tech (JNTUK) | *Sri Aditya Engineering College, Surampalem* | GPA: 67%

2011 – 2014
